What is a plant?

How many plants can you find when you go for a walk or in your garden? What do plants look like? Are they all the same? Where do plants grow?

Your task this week is to look for plants in different places

Can you draw a

1. plant
2. flower
3. leaf
4. What is the biggest plant you can find?

Collect different leaves from plants and trees.

Can you name some plants?

Success Criteria:

1. Watch the link about different types of plants
2. Talk about what you think a plant is
3. Take a walk and see what different plants you see when you are outside
4. Draw pictures of some of the plants you see

**Do all plants have flowers?**

**Name some of the places you saw a plant growing.**

**Do all plants have leaves?**

**What do all plants have in common? (What makes a plant a plant?)**

Plants (Draw them as they look now in Spring. Write their names. Label them.)

Name some more plants you know:
