

1. Make a Snakes and Ladders board with addition and subtraction calculations to 20 (or print the one on this page if you'd rather)
2. Play Snakes and Ladders using your fantastic addition and subtraction skills to work your way to the finishing square!

Please try and make your own snakes and ladders board - it's fun to do and means that you can set your own level of challenge. It also means you can add as many slippery snakes or lucky ladders as you choose!

## How to play...

1. Players take it in turns to roll the dice. The player with the highest number goes first, the person with the second highest goes second and so on.
2. The player moves the counter the number of spaces shown on the dice.
3. If a player lands on a snake's head, the player's counter slides down to the square at the snake's tail.
4. If a player lands on the bottom of a ladder, the player's counter climbs up to the square at the top of the ladder.
5. The first player to reach the finish is the winner!

## Task: You are going to be making and playing addition and subtraction Snakes and Ladders!

Success Criteria:

1. Make a Snakes and Ladders board with addition and subtraction calculations on each square (or print the one on this page if you'd rather)
2. Play Snakes and Ladders using your fantastic addition and subtraction skills to work your way to the finishing square!

Please try and make your own snakes and ladders board - it's fun to do and means that you can set your own level of challenge. It also means you can add as many slippery snakes or lucky ladders as you choose!

Year 3, for an extra challenge why don't you try and include some addition and subtraction questions using three-digit numbers?
