Check each calculation shown below. What calculation can you use to check? If there's a mistake, correct it!

$$
65+32=97
$$

$$
127+165=281
$$

$$
56 \div 7=8
$$

$$
250 \div 10=24
$$

$$
92 \div 4=23
$$

$$
42 \times 3=116
$$

$$
658-245=413
$$

$$
293-186=113
$$

## Steppingstone activity

CANONBUR
PRIMARY SCHOO

Summer week 8 Lesson 5 - 19.06.20
LO: To Draw Line Graphs

## Success Criteria:

1. Look at data and work out the scale for your Y axis - what is the greatest amount?
2. Draw and label both axis and give your graph a title.
3. Plot points with dots or small neat crosses
4. Join your points.

Model

## Drawing Line graphs

Make up 3 questions you could ask about your graph.

## Now complete this:

The table shows average rainfall in Leicester over a year. Complete the graph using the information from the table.

| Month | Rainfall <br> $(\mathrm{mm})$ |
| :---: | :---: |
| Jan | 54 |
| Feb | 40 |
| Mar | 38 |
| Apr | 38 |
| May | 48 |
| Jun | 46 |
| Jul | 58 |
| Aug | 60 |
| Sep | 50 |
| Oct | 57 |
| Nov | 65 |
| Dec | 50 |

Summer week 8 Lesson 5 - 19.06.20

## LO: To draw line graphs

## Success Criteria:

1. Look at data and work out the scale for your Y axis - what is the greatest amount?
2. Draw and label both axis and give your graph a title.
3. Plot points with dots or small neat crosses
4. Join your points.

## Mild/ Spicy

Here is a table showing the conversion between pounds and rupees. Present the information as a line graph.

| Pounds | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Rupees | 80 | 160 | 240 | 320 | 400 | 480 | 560 | 640 | 720 | 800 |

Now ask and answer 4 questions about your graph.

## Summer week 8 Lesson 1 - 19.06.20

## Red Hot

## Draw and finish this graph using the clues.

........ Daisy's Sunflower

-     -         -             -                 - Marlon's Sunflower
$\longrightarrow$ Rami's Sunflower

1) In week 1, Marlon's sunflower was 2 cm shorter than Daisy's sunflower.
2) In week 2, there was 6 cm height difference between Marlon's and Rami's sunflowers. Rami's sunflower was taller than Marlon's.
3) In week 3, Daisy's sunflower was taller than Marlon's but shorter than Rami's. Its height was an odd number of cm .
4) By week 4, Daisy's sunflower had grown 18 cm since week 1. However, it was still 1 cm shorter than Marlon's sunflower.
5) In week 5, Rami's sunflower was 1 cm taller than Marlon's.
6) In week 6, Daisy's sunflower was 1 cm taller than Rami's.
7) By week 7, Rami's sunflower was the tallest, towering 5 cm over Marlon's sunflower and 2 cm over Daisy's.
8) By the end of the investigation, Rami's sunflower had grown the tallest. It had grown 40 cm from its starting height.
