Statement

This school is committed to reducing the barriers to sharing in school life and learning for all its pupils. This policy sets out the steps which the school will take to ensure full access to learning for all its children who have medical needs and are able to attend school.

This policy has been developed in line with the

[DfE publication 'Supporting pupils at school with medical conditions December 2015'.](#)

1. Managing prescription medicines which need to be taken during the school day

1.1 Parents/carers should provide full written information about their child's medical needs.

1.2 Short-term prescription requirements should only be brought to school if it is detrimental to the child's health not to have the medicine during the school day. If the period of administering medicine is 8 days or more, there must be an individual Pupil Health Care Plan.

1.3 The school will not accept medicines that have been taken out of the container as originally dispensed, nor make changes to prescribed dosages.

1.4 The school will not administer medicines that have not been prescribed by a doctor, dentist, nurse prescriber or pharmacist prescriber, unless it is done as part of an individual Pupil Health Care Plan. The school will inform parents of this policy.

1.5 Some medicines prescribed for children (e.g. methylphenidate, known as Ritalin) are controlled by the Misuse of Drugs Act. Members of staff are authorised to administer a controlled drug, in accordance with the prescriber's instructions. A child may legally have a prescribed controlled drug in their possession. The school will keep controlled drugs in a locked non-portable container, to which only named staff will have access. A record of access to the container will be kept. Misuse of a controlled drug is an offence, and will be dealt with under the school's behaviour policy.

1.6 Medicines should always be provided in the original container as dispensed by a pharmacist and should include the prescriber's instructions for administration. In all cases this should include:

- Name of child
- Name of medicine
- Dose
- Method of administration
- Time/frequency of administration
- Any side effects
- Expiry date (Paragraph 35)

1.7 The school will refer to the DfE guidance document when dealing with any other particular issues relating to managing medicines.

2. Procedures for managing prescription medicines on trips, outings and during sporting activities

2.1 The school will consider what reasonable adjustments might be made to enable children with medical needs to participate fully and safely on visits. This may extend to reviewing and revising the visits policy and procedures so that planning arrangements incorporate the necessary steps to include children with medical needs. It might also incorporate risk assessments for such children.

2.2 If staff are concerned about how they can best provide for a child's safety or the safety of other children on a visit, they should seek parental views and medical advice from the school health service or the child's GP. Please refer to the EVOLVE guidance on planning educational visits.

2.3 The school will support children wherever possible in participating in physical activities and extracurricular sports. Any restriction on a child's ability to participate in PE should be recorded on their individual Pupil Health Care Plan.

2.4 Some children may need to take precautionary measures before or during exercise, and may need access, for example, to asthma inhalers. Staff supervising sporting activities will be made aware of relevant medical conditions, and will consider the need for a risk assessment to be made.

2.5 The school must cooperate with the Local Authority in fulfilling its responsibilities regarding home to school transport. This may include giving advice regarding a child's medical needs.

3. The roles and responsibilities of staff managing administration of medicines, and for administering or supervising the administration of medicines

3.1 Close cooperation between schools, parents/carers, health professionals and other agencies will help provide a suitably supportive environment for children with medical needs.

3.2 It is important that responsibility for child safety is clearly defined and that each person responsible for a child with medical needs is aware of what is expected of them.

3.3 The school will always take full account of temporary, supply and peripatetic staff when informing staff of arrangements for the administration of medicines.

3.4 The school will always designate a minimum of two people to be responsible for administering medicine to a child.

3.5 Staff should never give a non-prescribed medicine to a child unless this is part of an individual Pupil Health Care Plan, involving specific written permission from the parents/carers. Where the head agrees to administer a non-prescribed medicine it must be in accordance with this policy. The school will inform parents of this policy. Criteria in the national standards for under 8s day care make it clear that non-prescription medicines should not normally be administered. Where a non-prescribed medicine is administered to a child it should be recorded on a form such as Form 5 or 6 (can be found in the Form Sets) and the parents/carers informed. If a child suffers from frequent or acute pain the parents/carers should be encouraged to refer the matter to the child's GP.

3.6 National Guidance states: 'A child under 16 should never be given aspirin or medicines containing ibuprofen unless prescribed by a doctor.' The school will inform parents of this policy.

3.7 Any controlled drugs which have been prescribed for a child must be kept in safe custody.

3.8 If a child refuses to take medicine, staff will not force them to do so. Staff should record the incident and follow agreed procedures (which should be set out in the policy or the child's Health Care Plan). Parents/carers will be informed of the refusal on the same day. If refusal results in an emergency, the school's normal emergency procedures will be followed.

3.9 If in doubt about a procedure, staff should not administer the medicine, but check with the parents or a health professional before taking further action.

The DfE guidance document gives a full description of roles and responsibilities.

4. Parental responsibilities in respect of their child's medical needs

4.1 It is the parents/carers' responsibility to provide the Head teacher with sufficient written information about their child's medical needs if treatment or special care is needed.

4.2 Parents are expected to work with the Head teacher to reach an agreement on the school's role in supporting their child's medical needs, in accordance with the school's policy.

4.3 It is the parents/carers' responsibility to check expiry dates of medicine.

4.4 If parents/carers have difficulty understanding or supporting their child's medical condition themselves, they should be encouraged to contact either the school nurse or the health visitor, as appropriate.

4.5 It is the parents/carers' responsibility to keep their children at home when they are acutely unwell.

4.6 It requires only one parent/carer to agree to or request that medicines are administered to a child. It is likely that this will be the parent with whom the school has day-to-day contact.

4.7 Prior written agreement should be obtained from parents/carers for any medicines to be given to a child. (See [Form sets](#)).

5. Assisting children with long-term or complex medical needs

5.1 Where there are long-term medical needs for a child, including administration of medicine for a period of 8 days or more, an Individual Pupil Health Care Plan (IHCP) should be completed, either using:

5.1.1 Form 2 Pupil Health Care Plan

5.1.2 Asthma IHCP

5.1.3 Allergy/Anaphylaxis IHCP

5.1.4 Diabetes IHCP

5.1.5 Epilepsy IHCP

5.2 A Pupil Health Care Plan clarifies for staff, parents/carers and the child the help that can be provided. It is important for staff to be guided by the school nurse or the child's GP or paediatrician.

5.3 The school will agree with parents/carers how often they should jointly review the health care plan. It is sensible to do this at least once a year, but much depends on the nature of the child's particular needs; some would need reviewing more frequently.

5.4 The school will judge each child's needs individually as children and young people vary in their ability to cope with poor health or a particular medical condition. Plans will also take into account a pupil's age and need to take personal responsibility.

5.5 Developing a Pupil Health Care Plan should not be onerous, although each plan will contain different levels of detail according to the needs of the individual child.

5.6 In addition to input from the school health service, the child's GP or other health care professionals depending on the level of support the child needs, those who may need to contribute to a health care pro forma include the:

- Head teacher
- Parent or carer
- Child (if appropriate)
- Early Years Practitioner/Class Teacher –
- Support staff
- Staff who are trained to administer medicines
- Staff who are trained in emergency procedures (Paragraph 122)

5.7 The school will consult the DfE publication 'Supporting pupils at school with medical conditions December 2015' when dealing with the needs of children with the following common conditions:

- Asthma
- Epilepsy
- Diabetes
- Anaphylaxis

5.8 Regarding epilepsy, some children may be prescribed rectal diazepam as a treatment for prolonged seizures. Staff involved must have received training from local health services. A written authorisation from the GP, Consultant or Epilepsy Specialist Nurse must have been received for each child, along with instructions for use. Form 9 (can be found in [Form sets](#)) may be used for this purpose. Two adults must be present for such treatment, at least one being of the same gender as the child. The dignity of the child must be protected as far as possible.

6. Policy on children carrying and taking their prescribed medicines themselves (An example of this would be a child with asthma using an inhaler)

6.1 It is good practice to support and encourage pupils, who are able, to take responsibility to manage their own medicines. If such medicines are taken under supervision, this should be recorded.

6.2 There is no set age when a child or young person can take responsibility for their own medication. This needs to be a joint decision between school, parents/carers and the pupil. Please refer to Form 7 (can be found in Form sets).

6.3 Where pupils have been prescribed controlled drugs, these must be kept in safe custody. Pupils could access them for self-medication if it was agreed that this was appropriate.

7. Staff support and training in dealing with medical needs

7.1 The school will ensure that there are sufficient members of support staff who manage medicines. This will involve participation in appropriate training.

7.2 Any member of staff who agrees to accept responsibility for administering prescribed medicines to a child does so voluntarily and will have appropriate training and guidance. They will also be made aware of possible side effects of the medicines, and what to do if they occur. The type of training necessary will depend on the individual case.

7.3 Teachers' conditions of employment do not include giving or supervising a pupil taking medicines. Agreement to do so must be voluntary.

7.4 The school will ensure that staff receive proper support and training where necessary, in line with the contractual duty on Head teachers to ensure that their staff receive the training. The Head teacher will agree when and how such training takes place, in their capacity as a line manager. The head of the school will make sure that all staff and parents/carers are aware of the policy and procedures for dealing with medical needs.

7.5 Staff who have a child with medical needs in their class or group will be informed about the nature of the condition, and when and where the child may need extra attention.

7.6 The child's parents/carers and health professionals should provide the information specified above.

7.7 All staff should be aware of the likelihood of an emergency arising and what action to take if one occurs.

7.8 Back up cover should be arranged for when the member of staff responsible is absent or unavailable.

7.9 At different times of the day other staff, such as lunchtime supervisors, may be responsible for children. They will also be provided with training and advice.

8. Record keeping

8.1 Parents/carers should tell the school about the medicines that their child needs to take and provide details of any changes to the prescription or the support required. However staff should make sure that this information is the same as that provided by the prescriber. Any change in prescription should be supported by either new directions on the packaging of medication or by a supporting letter from a medical professional.

8.2 The school will use Form 3A (can be found in [form sets](#)) to record short-term administration of medication. Consent forms should be delivered personally by the consenting parent/carer. Staff should check that any details provided by parents, or in particular cases by a paediatrician or specialist nurse, are consistent with the instructions on the container.

8.3 The school will use Form 3B (can be found in [form sets](#)) to record long-term administration of medication. Consent forms should be delivered personally by the consenting parent/carer. Staff should check that any details provided by parents, or in particular cases by a paediatrician or specialist nurse, are consistent with the instructions on the container.

8.4 It is the parent/carer's responsibility to monitor when further supplies of medication are needed in the school. It is not the school's responsibility.

8.5 Form 4 (can be found in [form sets](#)) should be used to confirm, with the parents/carers, that a member of staff will administer medicine to their child.

8.6 Although there is no similar legal requirement for schools to keep records of medicines given to pupils, and the staff involved, it is good practice to do so. Records offer protection to staff and proof that they have followed agreed procedures. Some schools keep a logbook for this. Forms 5 and 6 (can be found in [form sets](#)) provide example record sheets. This school will keep a logbook of medicines given.

9. Safe storage of medicines

9.1 The school will only store, supervise and administer medicine that has been prescribed for an individual child.

9.2 Medicines will be stored strictly in accordance with product instructions - paying particular note to temperature and in the original container in which dispensed.

9.3 Staff will ensure that the supplied container is clearly labelled with the name of the child, the name and dose of the medicine, the method and frequency of administration, the time of administration, any side effects and the expiry date.

9.4 Where a child needs two or more prescribed medicines, each will be in a separate container.

9.5 Non-healthcare staff will never transfer medicines from their original containers.

9.6 Children will be informed where their own medicines are stored and who holds the key.

9.7 All emergency medicines, such as asthma inhalers and adrenaline pens, will be readily available to children and will not be locked away.

9.8 Schools may not allow children to carry their own inhalers.

9.9 Other non-emergency medicines will be kept in a secure place not accessible to children.

9.10 A few medicines need to be refrigerated. They can be kept in a refrigerator containing food but must be in an airtight container and clearly labelled. There will be restricted access to a refrigerator holding medicines. It is acceptable for a staff room fridge to be used for storage, as long as medical items are clearly labelled.

9.11 Access to Medicines - Children need to have immediate access to their medicines when required. The school will make special access arrangements for emergency medicines that it keeps. However, it is also important to make sure that medicines are kept securely and only accessible to those for whom they are prescribed. This will be considered as part of the policy about children carrying their own medicines.

10. Disposal of Medicines

10.1 Staff should not dispose of medicines. Parents/carers are responsible for ensuring that date-expired medicines are returned to a pharmacy for safe disposal. Return of such medicines to parents should be documented.

10.2 Parents/carers should also collect medicines held at the end of the academic year. If parents/carers do not collect all medicines, they will be taken to a local pharmacy for safe disposal. This process should be documented.

10.3 Sharps boxes will always be used for the disposal of needles. Collection and disposal of the boxes will be arranged with the Local Authority.

11. Hygiene and Infection Control

11.1 All staff should be familiar with normal precautions for avoiding infection and follow basic hygiene procedures

11.2 Staff will have access to protective disposable gloves and will take care when dealing with spillages of blood or other body fluids, and disposing of dressings or equipment.

11.3 The School Premises Regulations 2012 and the Education (Independent School Standards) Regulations 2010 as amended January 2013 require every school to have a room appropriate and readily available for use for medical or dental examination and treatment and for the caring of sick or injured pupils. It must contain a washbasin and be reasonably near a water closet. It must not be teaching accommodation. If this room is used for other purposes as well as for medical accommodation, the body responsible must consider whether dual use is satisfactory or has unreasonable implications for its main purpose. The responsibility for providing these facilities in all maintained schools rests with the Local Authority.

12. Access to the school's emergency procedures

12.1 As part of general risk management processes the school must have arrangements in place for dealing with emergency situations. This could be part of the school's first aid policy and provision.

12.2 Other children should know what to do in the event of an emergency, such as telling a member of staff.

12.3 All staff should know how to call the emergency services. Guidance on calling an ambulance is provided in Form 1 (can be found in [form sets](#)).

12.4 All staff should also know who is responsible for carrying out emergency procedures in the event of need.

12.5 A member of staff will always accompany a child taken to hospital by ambulance, and will stay until the parent arrives.

12.6 Health professionals are responsible for any decisions on medical treatment when parents/carers are not available.

12.7 Staff should never take children to hospital in their own car; it is safer to call an ambulance.

12.8 Individual Pupil Health Care Plans will include instructions as to how to manage a child in an emergency, and identify who has the responsibility in an emergency. Those with responsibility at different times of day (e.g. lunchtime supervisor) will need to be very clear of their role.

13. Risk assessment and management procedures

13.1 This policy will operate within the context of the school's Health and Safety Policy.

13.2 The school will ensure that risks to the health of others are properly controlled.

13.3 The school will provide, where necessary, individual risk assessments for pupils or groups with medical needs.

13.4 The school will be aware of the health and safety issues relating to dangerous substances and infection.

14. Use of Emergency Salbutamol Inhalers ([see Guidance on the use of emergency salbutamol inhalers in school](#))

14.1 From 1st October 2014 the Human medicines Regulations were amended to allow schools to buy salbutamol inhalers, without a prescription, for use in emergencies.

14.2 The inhalers must only be used by children, for whom written parental consent for use of the emergency inhaler has been given, who have either been diagnosed with asthma and prescribed an inhaler, or who have been prescribed an inhaler as reliever medication.

14.3 The inhaler will only be used if the pupil's prescribed inhaler is not available.

Form Sets FORM

Contacting Emergency Services

Request for an Ambulance

Dial 999, ask for ambulance and be ready with the following information

Canonbury Primary School N1 2UT
[insert brief description]

Notes:

1. Speak clearly and slowly and be ready to repeat information if asked 2.
- Put a completed copy of this form by the telephone.

FORM 2B

Individual Health Care Plan Allergies / Anaphylaxis

This plan relates to the health care needs provided to this school to the child / young person named below in relation to the safe management of the condition above. School staff involved in the day to day care of this child should be made familiar with the contents of this plan so they are aware of when they need to act, and what they and others need to do.

Child _____ **Date of Birth** _____ **Class** _____

Any allergic reaction, including the most extreme form, anaphylactic shock, occurs because the body's immune system reacts inappropriately in response to the presence of a substance that it wrongly perceives as a threat.

Anaphylaxis Campaign

Emergency Contact details:

Possible symptoms of allergic reactions

A life threatening reaction

Airway	- Tightness or a lump in the throat, hoarse voice, hacking cough.
Breathing	- Short of breath, cough, not able to speak in full sentences, noisy breathing, wheezing.
Conscious level	- Feeling faint, weakness or floppiness, glazed expression, unconscious.
Deterioration	- Symptoms getting steadily worse.

If a child is having a life threatening reaction

1. Give Autoinjector in the outer thigh muscle.
2. Once the Autoinjector has been given, Dial 999 for the ambulance. even if the child is making a good recovery
3. If the child is conscious and having breathing difficulties, help them to sit up. If they are faint or floppy, they are better lying flat with their legs raised up.
4. Repeat dose in 5 -10 mins if continued deterioration – often given by the ambulance crew

A non life threatening reaction

Eyes	- itchy, runny, swollen
Nose	- Itchy, runny, congested
Mouth	- itchy or swollen lips or mouth
Skin	- itchy hives or nettle rash, redness, swelling of the face or other parts of the body
Gut	- nausea, stomach cramps, vomiting, diarrhoea

If the child is having a non life-threatening reaction:

1. Give Antihistamine syrup or tablet
2. The child should Rest and • Not do strenuous exercise 🏃 Not eat a heavy meal. • Not have any form of fizzy drink. • Not have a hot bath or shower 🚿
3. Contact the parents or guardian
4. Do not leave the child alone as the severity of symptoms can change quickly

Emergency care

Emergency Inhalers

From 1st October 2014 the Human Medicines (Amendment) (No. 2) Regulations 2014 will allow schools to obtain, without a prescription, salbutamol inhalers, if they wish, for use in emergencies. This will be for any pupil with asthma, or who has been prescribed an inhaler as reliever medication. The inhaler can be used if the pupil's prescribed inhaler is not available (for example, because it is broken, or empty).

The emergency salbutamol inhaler can only be used by children, where parental consent for use of the emergency inhaler has been given, who have either been diagnosed with asthma or prescribed an inhaler, or who have been prescribed an inhaler as reliever medication.

..... **School holds inhalers in school for use in an emergency. Please complete the form below to confirm that you consent to an emergency inhaler being used for your child.**

CONSENT FORM: USE OF EMERGENCY SALBUTAMOL INHALER

1. I can confirm that my child has been diagnosed with asthma / has been prescribed an inhaler [delete as appropriate].
2. My child has a working, in-date inhaler, clearly labelled with their name, which will be kept in school for their use
3. In the event of my child displaying symptoms of asthma, and if their inhaler is not available or is unusable, I consent for my child to receive salbutamol from an emergency inhaler held by the school for such emergencies.

Diabetes is a condition where the amount of glucose in the blood is too high because the body cannot use it properly.

This is because the pancreas doesn't produce any insulin, or not enough insulin, to help glucose enter the body's cells – or the insulin that is produced does not work properly (known as insulin resistance).

FORM 2E

Individual Health Care Plan Epilepsy

This plan relates to the health care needs provided to this school to the child / young person named below in relation to the safe management of the condition above. School staff involved in the day to day care of this child should be made familiar with the contents of this plan so they are aware of when they need to act, and what they and others need to do.

Child_____ **Date of Birth**_____

Class_____

Having epilepsy means that you have a tendency to have epileptic seizures. A seizure happens when there is a sudden burst of intense electrical activity in the brain, which causes a temporary disruption in the way the brain normally works. Epilepsy.org.uk

FORM 3A Parental Agreement for School/Setting to Administer Medicine (short-term)

The school/setting will not give your child medicine unless you complete and sign this form, and the school or setting has a policy that the staff can administer medicine. You are also agreeing to other appropriate employees of the Local Authority (such as Home-School transport staff) to administer medicine if authorised to do so by the school/setting.

Name of school/setting	
Name of child	
Date of birth	/ /
Group/class/form	
Medical condition or illness	

Medicine

Name/type of medicine (as described on the container)	
Date dispensed	/ /
Expiry date	/ /
Agreed review date to be initiated by	[name of member of staff]
Dosage and method	
Timing	
Special precautions	
Are there any side effects that the school/setting needs to know about?	
Self administration	Yes ☐ No ☐
Procedures to take in an emergency	

Contact Details

I accept that this is a service that the school/setting is not obliged to undertake. I understand that I must notify the school/setting of any changes in writing. I understand that a non-medical professional will administer my child's medication, as defined by the prescribing professional only.

FORM 3B Parental Agreement for School/Setting to Administer Medicine (longterm)

The school/setting will not give your child medicine unless you complete and sign this form, and the school or setting has a policy that the staff can administer medicine. You are also agreeing to other appropriate employees of the Local Authority (such as Home-School transport staff) to administer medicine if authorised to do so by the school/setting.

Name of school/setting	
Date	/ /
Child's name	
Group/class/form	
Name and strength of medicine	
Expiry date	/ /
How much to give (i.e. dose to be given)	
When to be given	
Any other instructions	
Number of tablets/quantity to be given to school/setting	

Note: Medicines must be in the original container as dispensed by the pharmacy.

The above information is, to the best of my knowledge, accurate at the time of writing and I give consent to school/setting and other authorised staff administering medicine in accordance with the school/setting policy. I will inform the school/setting immediately, in writing, if there is any change in dosage or frequency of the medication or if the medicine is stopped. I understand that a non-medical professional will administer my child's medication, as defined by the prescribing professional only.

If more than one medicine is to be given a separate form should be completed for each one.

FORM 4 Head Teacher/Head of Setting Agreement to Administer Medicine

It is agreed that [name of child] will receive [quantity and name of medicine] every day at [time medicine to be administered e.g. lunchtime or afternoon break].

[Name of child] will be given/supervised whilst he/she takes their medication by [name of member of staff].

This arrangement will continue until [either end date of course of medicine or until instructed by parent/carers].

FORM 5 Record of Medicine Administered to an Individual Child

Name of school/setting		
Name of child		
Date medicine provided by parent/carers	/	/
Group/class/form		
Quantity received		
Name and strength of medicine		
Expiry date	/	/
Quantity returned		
Dose and frequency of medicine		

--	--	--

FORM 7 Request for Child to Carry His/Her Own Medicine

(This form must be completed by parent/carers/guardian)

If staff have any concerns discuss this request with healthcare professionals.

School/Setting Information

Contact Information

I would like my son/daughter to keep his/her medicine on him/her for use as necessary.

If more than one medicine is to be given a separate form should be completed for each one.

FORM 8 Staff Training Record – Administration of Medicines/Medical Support

For Trainer

I confirm that [name of member of staff] has received the training detailed above and is competent to carry out any necessary treatment. I recommend that the training is updated [please state how often].

For Staff

I confirm that I have received the training detailed above.
