

Success Criteria:

- | |
|--|
| 1. Create a family tree. |
| 2. Write the person's name (it does not have to be their full name). |
| 3. List any characteristics or traits you may have in common with that person. |

Our new topic for this term is...

Evolution and inheritance

Task

The first part of this topic is all about understanding what inheritance is. So I would like you to create a family tree. A family tree is a chart which shows your family's history, including all the people who are part of it.

You can design the family tree any way you would like for example using pictures, in the shape of a tree, drawings, etc. All that I ask is that you write the person's name and write a characteristic which they may have in common with you. For example on my family tree I would have two boxes which look like this for my parents...

Allison McCullough (Mum)
Same eye colour brown and like reading books as a hobby

Ivan Collins (Dad)
We both have gaps in our teeth, same eye colour and same facial features.

I have left some examples of family trees for you to gain some inspiration. Looking forward to seeing your work.
