

Success Criteria:

1. Create an insect survey.
2. Go on an insect search.
3. Represent your findings in a graph.

Task 1

Today you will be completing a classification activity on insects.

Take a look at this survey example. Create your own example or you use this

one. <https://www.opalexplorenature.org/sites/default/files/7/image/Bugs%20Count%20recording%20sheet.pdf>

Take a walk outside or in your garden and search for as many different insects as possible. Try to set a time frame of 15-20 minutes for searching.

You can use this document <https://www.rbkc.gov.uk/PDF/Minbeasts%20pack.pdf> (Pg. 11 and 12) to support your identification of the insects.

Possible equipment you may want to use to support your search:

- Magnifying glass
- Small paintbrush
- Yogurt pot
- Net

Task 2

Now that you have recorded your results represent your findings in a graph of your choice. You can use different computer software such as Excel or draw the graph, it is completely up to you.
