

**Lesson 23**

**LO: To sort 2D shapes ANSWERS**

**Task 1:** Sort these 2-D shapes into the correct group

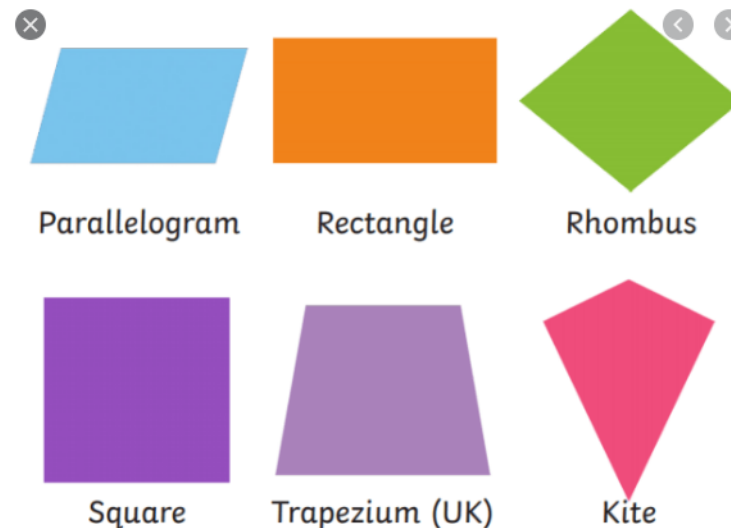

**Task 2:** Use the shape pictures at the top of the page or use the objects from your 2D shape hunt.

**Which shapes could belong to each group?**

4 sides	Not 4 sides
Square Rectangle Rhombus Parallelogram Kite Trapezium	Circle Triangle Pentagon Hexagon Octagon

Don't worry if you didn't name these 4 sided shapes – they are new names, but why not learn them now?!

**Year 3 Maths**

**Lesson 23 ANSWERS**

**LO: To recognise and describe 2D shapes**

**Success Criteria:**

**Now you try:** Draw a shape which could represent each letter in the Venn diagram:

Possible answers could be:

A – trapezium

B – square

C – right-angled triangle

D – hexagon

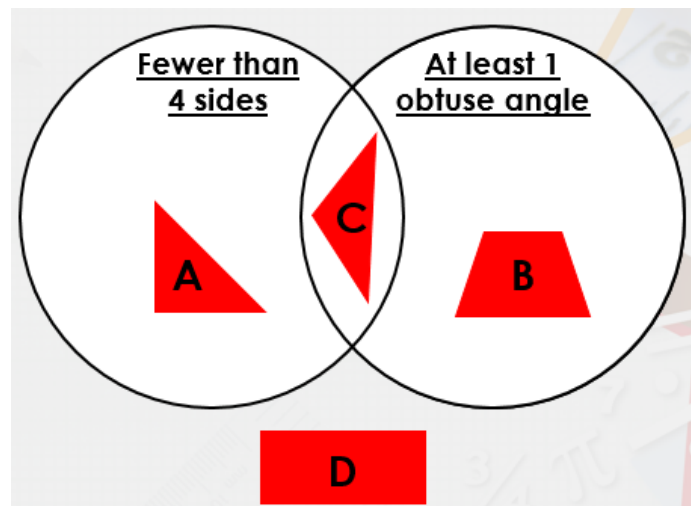

Complete at least 2 columns, more if you can!

**Task 1**

**Practice**

Draw a shape which could represent each letter in the Venn diagram below:

Possible answers

**Task 2**

**Practice**

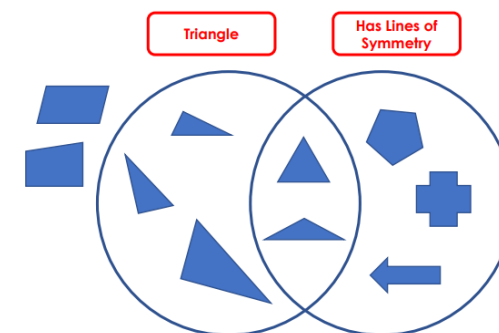

Draw at least one shape in each section of the diagram:

Possible answers

	At least one right angle	No right angles
4 sided		
Not 4 sided		

**Task 3**

**Reasoning**

Various possible ways to sort shapes including number of sides, angles and symmetry.

**Always, sometimes, never?**

**Quadrilaterals do not have acute angles.**

Sometimes because some quadrilaterals have acute angles such as trapeziums or parallelograms. However some quadrilaterals do not have acute angles such as squares and rectangles.
