

Lesson 30 LO: To find a third

Model: A third is another type of fraction. This is when something is split into **3 equal parts**. This picture shows one third of each shape is coloured in:

To find a third of an amount we **share into 3 equal groups**.

So: Find a third of 6:

- Share 6 into 3 equal groups.
- Count how many in one group
- **A third of 6 is 2**

Task 1:

Use your toys or objects at home to help find a third of these amounts by sharing them into 3 equal groups:

- a) Third of 3
- b) Third of 9
- c) Third of 18
- d) Third of 12

Task 2:

Which shapes represent one third?

Explain why the other circles do not represent one third.

Dora says,

I have one third of a pizza because I have one slice and there are three slices left.

Do you agree? Explain your reasoning.

If you can, begin by watching this BBC bitesize clip about tenths as decimals:

<https://www.bbc.co.uk/bitesize/clips/zr6pvcw>

LO: To understand tenths as decimals

Success Criteria:

1. The Tenths digit goes to the right of the Ones digit
2. Draw a **decimal point** between the Ones digit and the Tenths digit
3. After 9 tenths comes 10 tenths, this is the same as **1** whole.

Model: Decimals are another way we can represent tenths.

We can make numbers in a place value grid.

Hundreds	Tens	Ones
5	0	4

If we are using tenths, we need a new place value column.

Hundreds	Tens	Ones	•	Tenths

The tenths column is to the right of the ones column.
 We use a decimal point to write numbers containing tenths.

Ones	•	Tenths

There are 0 ones.
 There are 6 tenths.
 The number is 0.6

Ones	•	Tenths

There are 3 ones.
 There are 4 tenths.
 The number is 3.4

Now you try:

Ones	•	Tenths

There are ones.
 There are tenths.
 The number is

Count in tenths along the counting stick and write both the fractions and decimal numbers as you go:

e.g.

Hint! Think carefully about what the last number would be!

Maths – Main activity

Tenths as decimals

1 Complete the table.

Representation	Words	Fraction	Decimal
	1 tenth		0.1
		$\frac{7}{10}$	
			0.3
	5 tenths		

2 Match each bar model to the equivalent decimal.

0.8

0.6

0.4

3 Mo is using a place value chart to represent numbers.

Write each number as a decimal.

4 Draw counters to represent the numbers.

Canonbury Home Learning

5 Continue the pattern.

$\frac{1}{10}$	0.2	3 tenths	$\frac{4}{10}$	0.5
6 tenths				

6 What decimal is each arrow pointing to?

A = B = C =

7 Estimate the position of the decimals on the number lines.

a)

b)

c)

8 Complete the statements.

a) $0.2 > \frac{\square}{10}$

c) \square tenths = 0.7

b) $0.8 < \frac{\square}{10}$

d) $\square = \frac{12}{10}$

Is there more than one answer for each?

9 Aisha places 6 counters onto this place value chart.

List all the possible numbers she could represent.
